

SawMaster SDT-710

Wet Tile Saw

The perfect solution
for small tile projects

SAWMASTER
Diamond Tools, Inc.

The Leader In New Design Technology

Specifications

Saw Type	Tile
Motor	115 V/60 Hz
Motor Type	Carbon Brush
Horsepower	1 HP
Blade Capacity	6"~7"
Blade Arbor	5/8"
RPM	6000 RPM
Cutting Depth	1-3/4"
Rip Cutting	18"
Diagonal Cutting	12"
Weight	43 lbs
PP Water Tray	Equipped

SDT-710

Wet Tile Saw

Lightweight & Portable Compact

Features

The latest generation of the SDT-710 boasts several improvements over its predecessor. The saw's unique endoframe design yields significant weight savings due to its reliance on the surrounding water tray for support. And with the introduction of more resilient polypropylene trays, the SDT-710 is able to achieve a greater level of durability, which lends additional support for the upgraded 1 HP motor. For professionals seeking a complete out-of-the-box solution, the SDT-710S is available with a prepackaged folding stand.

SDT-710S includes the saw and a bundled folding stand.

Optional Accessories

7" Cheetah Porcelain
CR0780C

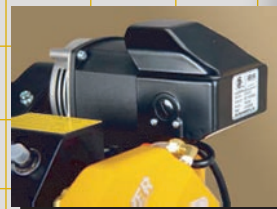

7" General Purpose
CR0780R

MasterGuide
S1000-MG

Carbon Brush Motor

The 1 HP carbon brush motor generates a tremendous amount of torque for incredible cutting performance.

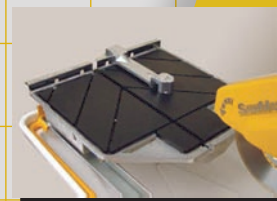

Water Tray

The SDT-710 utilizes an improved polypropylene water tray that offers better durability and support.

Cutting Table

The cutting table's injection mold rubber mat provides a firm, durable work surface while the ball bearing wheels and rollers ensure smooth, effortless movement. The result is a stable platform from which to perform precision cuts.

Thermal Overload Protection

Automatic thermal overload protection protects the saw from power surges and the motor from overheating.

LCBH

The patented LCBH (Liquid Cooled Bearing Housing) works in conjunction with the water pump to cool down the bearing housing during cutting operations.
