Motor	115 V/60 Hz
Motor Type	Carbon Brush
Horsepower	1/2 HP
Blade Capacity	6"~7"
Blade Arbor	5/8"
RPM	6000 RPM
Cutting Depth	1-3/4"
Rip Cutting	17"
Diagonal Cutting	12"
Weight	35 lbs
PP Water Tray	Equipped

SDT-710SE

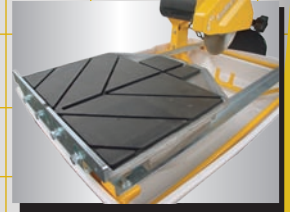

Wet Tile Saw

Lightweight & Portable Compact

Features

Cutting Table

The cutting table's injection mold rubber mat provides a firm, durable work surface while the ball bearing wheels and rollers ensure smooth, effortless movement. The result is a stable platform from which to perform precision cuts.

Cutting Height Adjustment

The adjustable cutting height grants the operator the flexibility of using blades of varying dimensions and the ability to specify different cutting depths.

Carbon Brush Motor

The 1/2 HP carbon brush motor generates a tremendous amount of torque for incredible cutting performance. The motor is protected by a reusable air filter for convenient maintenance.

Safety Rocker Switch

The easily accessible rocker-style power switch features a detachable safety tab that renders the saw inoperable when removed in the off position. Simply reinsert the tab before flipping the switch to the on position to reactivate the saw.

Transport Locking Mechanism

The cutting table is equipped with a spring lock to secure the cutting table when transporting the saw from one job site to another.

The SDT-710SE is an entry-level wet tile saw with an emphasis on portability that is evident in its compact and lightweight design.

Weighing just 35 lbs, it is equipped with a respectable 1/2 HP carbon brush motor and is capable of cutting tiles up to 17" in length, making it an ideal platform for DIYs and contractors working on small tile projects.
